

Lifelines Deluxe & X-Line

OVERVIEW

Deluxe™ Lifeline

- Rated for 11,600 lbs far exceeding OSHA requirements
- 12 strand design for long-lasting life cycle
- Available in 30', 50' lengths and custom lengths
- Resists UV and water absorption
- One of our best selling lifelines
- Compatible with all Super Anchor Safety Equipment

The 12 strand Deluxe lifeline and rope grab system includes our Super Grab™ non-mechanical rope grab device. Each line has its own serial number and warning label. This type of lifeline is normally used in salt water for crab pot lines up in Alaska, so it will hold up under the most rigorous job site conditions. The Super Grab rope grab device allows the lifeline length to be easily adjusted and provides a more cost effective system.

X-Line™

- Combines air hose and safety lifeline in one unit
- Workers cannot roof with air gun unless they are tied off
- Cuts down on tripping hazards by 50% instantly
- Long lasting materials used throughout
- Can be used in "Reverse" for even greater flexibility
- Pre-installed Super Grab™ Rope grab device
- Available in 30' and 50' lengths

The X-Line simply combines a fall protection lifeline and an air-hose in one product. This revolutionary product is helping roofers all across the country work safer and faster. By simply integrating the air hose into the middle of our 12 strand lifeline, you instantly cut down on the tripping hazards by half. Imagine 3 roofers up on the roof with their standard safety lifeline and air hose for a total of 6 "lines". With the X-Line, a roofer can roof again. No more rope management all day.
