

Lifelines

Value & Maxima

OVERVIEW

Maxima™ Lifeline

- 50' x 5/8" 3 strand Copolymer
- Aluminum swage eye splice w/ adhesive PVC cover
- 10,500lb (48kN) strength rating
- English-Spanish warning label
- Inspection label
- Available in 25' and 50' with custom lengths

This 3-strand vertical lifeline is very strong, abrasion & water resistant and is our least-expensive lifeline to date. This fills the void for the contractor who is on a budget but cannot sacrifice safety. We assemble the Maxima using a special aluminum swage and then cover it with an adhesive PVC Cover. The eye-splice houses a 3,600lb. gate strength, double locking snap hook, English/Spanish warning label and inspection report.

Value™ Lifeline

- Super strong & durable 5/8" rope
- Standard Value Line comes with our famous Super Grab
- Double locking snap hooks integrated into lifeline
- Serial number and warning label permanently attached
- Available in 25', 50', 75' and 100' stock lengths
- Custom lengths readily available
- Supplied with or without Rope Grab for your convenience

Our Value Lifeline is made from a 10,000lbs three-strand poly-dacron rope. What does this mean? Even though we call it our Value Lifeline, we do not skimp on the materials in this lifeline. The 3 strand lifeline will last you a long time and not cost you a fortune. This is the only lifeline we manufacture that comes with 2 double locking snap hooks – one on the end of the lifeline and one that is integrated into the modified Super Grab™ Rope Grab Device.
