

MAX Force Energy Absorbers

Ultra-Lite™ Series Dee-Web Loop Absorbers

Ultra-Lite is the next generation in energy absorbers and a Super Anchor Safety exclusive design. Eliminating the connector on the A-end of the absorber results in a more comfortable attachment and component weight is reduced nearly 50% less than standard model absorbers. Our most popular model No.6190 is fitted with an aluminum captive carabiner for the lightest weight of any absorber we make. Choose the Ultra-Lite model that suites you best.

**No. 6190
w/Aluminum
Carabiner**

**No. 6191-C
Stainless Steel
Fall Arrester**

**No. 6191-Z
