

Ladder Safety & Rescue

No. 6060 Trauma Suspension Ladder

WARNING! A worker suspended from a full body harness can succumb to asphyxiation in less than 15 min. A self deployed suspension ladder attached to a full body harness is designed to relieve suspension trauma prior to rescue. A must for all workers exposed to free fall hazards. Easy to use, compact and light weight.

Storage Pouch 3-1/2 x 7-1/2" Wt. 3.6 oz.

- Polypro material
- Universal fit
- Attaches to any full body harness.
