WS TrussBar™ No.2835

The WS-TrussBar is an SAS exclusive design specified for use in attic spaces where other types of fall protection anchorage devices are not practical to install. Mfg. from lightweight aluminum the WS-TrussBar easily installs to the underside of all standard size top chords and is adjustable for 12", 16" and 24" top chord spacing. The bar legs easily rotate to compensate for imperfect top chord spacing. Use for single person PPE tie-off or HLL systems.

Compliance: OSHA 1926.502(b)(4)(i)
OSHA 1926.1203(e)(2)(ii) / ANSI Z359.1-07

- 5,000lb min. tensile strength
