

RS™ Series Anchors

OVERVIEW

The industry standard for permanent or temporary use on new or recovered roofing projects. RS models are compatible with many types of roofing and siding materials. Designed for installation at the ridge, in the field or wall mounted. Can be installed using nails or screws over sheathed framing members and metal decks. The 1,000 hr salt spray tested Dacromet coating provides a high level of protection against oxidation compared to yellow zinc.

For areas where salt air is present, the Retro-Fit and RS-20 models are available in 100% Stainless Steel with dual holes

2 Model Types with Super Anchor Safety Exclusive Features
