

Anchors Tile Roof Retro-Fit

OVERVIEW

The Tile Roof RetroFit anchor is designed to be installed on all types of tile roofs. The anchor strap is 40" long not including the D-rings. This length allows the D-rings to protrude in between the last course of tile. They can be installed on new construction or be retrofitted onto the roof and it installs with 8 stainless steel spiral shank nails (included). This low-profile anchor is aesthetically pleasing and can also be painted to match the roof color.

Device: Fall Arrest Anchor

Material: Stainless Steel or A-36 Mild Steel

D-Rings: 3,600-pound proof loaded, Dacromet Coated

Install Hardware: 316 stainless steel nails

Min. Tensile: 5,000 pounds

Working Radius: Direction of Roofing Slope

Specification Use: 1 person Fall Arrest, 2 person Fall Restraint

Max Weight: 340 pounds with tools

Engineering: 3rd Party Certified

Compliance: OSHA 1926:502, 1910.66, ANSI Z359.1-07, A10.32-2012
