

Anchors Tie-off Straps

OVERVIEW

Tie-off straps are made of 2" wide polyester or nylon and specified for use as temporary anchorage points for Lifelines, Self Retracting Lifelines, Web Lanyards, Rope Lanyards and components compatible with all Super Anchor Safety Equipment and Self Retracting Lifeline equipment.

Designed for use with wood, steel and concrete structures, Tie-Off straps are wrap cinched or embedded into concrete. Several of the models are manufactured by Super Anchor Safety at our factory in Monroe, WA USA and may be fabricated as a custom length upon request.
