

# Commercial Anchors • Loop Top Fixtures

## SAS Cast Loop Top Fixtures

Super Anchor Safety offers 2 proprietary loop top and pass through designs with several attachment options that comply with US fall protection standards. The same designs we use on our CRA, CRZ and CRO commercial roof anchors and risers. These fixtures are made with high strength cast steel and 316 stainless steel. For your assurance our loop tops are 3rd party tested and certified for personal fall protection and horizontal lifeline systems. A Super Anchor Safety exclusive with engineering you won't find anywhere else.

- Stock and Custom sizes available
- Field weld, Bolt through or stud bolt attached
- Raw, Hot Dip Galvanized or 316 grade stainless steel
- 3rd party certified models 1090 for 5,000lb min. tensile strength
- 3rd party certified models 1093 for 10,000lb min. tensile strength
- Streamlined cast steel design
- Permanent stamp marks for traceability
- Certification and test documents upon request
- 1090-1093 models comply with IWCA 1-14.1 Window Washing standard, OSHA 1926:502 and ANSI-Z359.1-07
- Loop Tops are certified for on site 2,500lb maximum proof load
- 1093 complies with CAL-OSHA Title 8. 5,000lb no permanent deformation with the load applied in any direction
- Stud Bolt attached models are not specified for window washing
