

Harnesses

Deluxe™

OVERVIEW

The Deluxe Harness is available in 5 sizes including Medium and Long-Large. High quality construction is evident the first time you put this harness on. Extreme comfort is realized even with loaded tool-bags. The ergonomic design of the Deluxe spreads the load of the tool bag weight over your entire torso, not just your hips like standard tool bag systems. The Deluxe is available without tool bags, too. This allows you to use your own tool bags or to totally customize the harness set up.

The Deluxe Ultra Vis Harness combines all of the features found in our deluxe harness with special high visibility fabric and 3M Heat laminated reflective strip. This harness is fully compatible with our line of All-Pakka™ Tool Bags for the ultimate in job site safety and comfort. The harnesses are available in 4 sizes and can have our MAX Force™ Shock Absorbers factory attached. Comfort, Durability and Quality all built into one harness.
