

Harnesses Deluxe™

OVERVIEW

Deluxe Ultra-Viz™ Certified Class 1 High-visibility

Looking for a harness designed for all day comfort, then look no further the Deluxe Harness is the one for you. Designed with all day comfort in mind, this harness spreads the load of tool bag weight over your entire torso, not just your hips. To ensure its design, we field tested this harness for two years, before it was put in to production. We, also, loaded it with features you will not find in any other harness on the market. These features include our Tri-Lam3™ padding that is a closed cell foam that resist water penetration, side D-rings and hook and loop to stabilize the tool bags. We offer the Deluxe in five sizes, seven colors and with or without tool bags. The first time you put on this harness the quality construction will be evident.

Are you required to wear a Class 1 high-visibility outerwear for your job? If so, the Deluxe Ultra-Viz™ harness is the perfect choice. The Ultra-Viz combines high-viz fabrics with 3M reflective tape and our Tri-Lam3 padding to produce a super comfortable full body harness that's a Super Anchor Safety exclusive design. Do you want even higher visibility? Simply add our matching Ultra-Viz tool bags and hammer holder to the harness. This harness is 3rd party certified to comply with ANSI and CSA class 1 high visibility.
