

Full Body Harness Rigging Examples

No.6001 Harness

When using a synthetic lifeline for personal fall protection, CSA Z259.2.5 requires a fall arrester with a panic grab function, to be factory attached to an energy absorber (E/A). For a fully compliant system, use our Value-Z™ CSA certified lifelines to attach to a full body harness.

Ultra-Lite™ E/A's

Eliminating a dorsal D-ring connector results in a more comfortable and lighter weight system.

CSA Certified Vertical Lifelines

Value-Z™ 25ft or 50ft length lifelines are supplied w/No.4015-Z fall arrester factory attached to the E/A.

No.4025-ZSH

No.4025-ZUL

No.4015-Z Fall Arrester

w/panic grab function is easily removed from the lifeline.

No.6101 Deluxe™ Harness

Ultra-Lite™ Dee-Loop Attachment

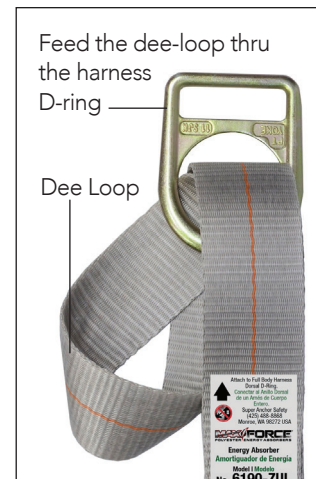

Our lightest most comfortable E/A is easy to attach to the harness dorsal D-ring.

Cinch the dee-loop tightly

No.6180-ZZ E/A

Shock Pack

Fall Arrester

Feed the fall arrester and shock pack thru the dee-loop
