

All-Pakka[®] Tool Bag Harness and Accessories

You won't find a better designed tool bag harness than the All-Pakka[®]. Ideal for work where fall protection is not required. Using the same high quality materials and fabrication as our top selling Deluxe[™] harness. The Tri-Lam3[™] fully padded frame and waist belt provide comfortable support of heavily loaded tool bags, distributing the weight over the shoulders and hips. An ergonomic advantage over waist belt supported tool bags that distributes 100% of the weight on your hips. To add even more comfort, the padded frame is designed to stay in place without an annoying chest strap. Successfully field tested by dozens of workers for over 2 years, the All-Pakka[®] tool bag harness combines durability and exceptional quality with a unique design that's built to last for many years of service. Made in our Monroe, WA factory, USA.

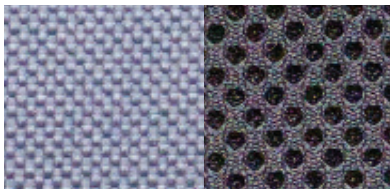

Features:

- Tri-Lam3 padded frame and waist belt in several color and fabric combinations
- Unique design does not require a chest strap
- Hook and loop tool bag stabilizer maintains tool bag position on the waist belt
- Heavy duty belt loops support fully loaded tool bags
- Hook and loop waist belt closure for perfect adjustment
- Heavy duty 2" wide utility belt with stainless steel buckle and industrial grade grommets.
- Specified for use in Canada

A fully padded sturdy frame distributes the weight of the tool bags over your hips and shoulders.
