

Utility Belts

All-Pakka® and Ultra-Viz™ utility belts are mfg. with heavy gauge polypro webbing, commercial grade sst grommets and a heavy duty sst dual tongue buckle. Belts are a critical component because they have to hold up heavily loaded tool bags all day long. Tradesmen tell us that the number 1 and 2 problem with tool bag belts, are grommets that pop out and one size fits all belt lengths that require the worker to cut to length. SAS belts are built to hold up heavily loaded tool bags without coming apart and are available in 4 sizes to custom fit your waist. You won't find a higher quality more durable belt than All-Pakka® and Ultra-Viz™

No.6405 All-Pakka®

Tool Bag Utility Belt
