

# SUPER ANCHOR SAFETY®

## Stainless Steel Spiral Shank Nail Specifications 09-14-2022

### To all dealers and end users:

RS-series and other model fall protection anchors supplied by Super Anchor Safety (**SAS**) specify 3.0" length SST spiral shank nails as one of the fastener options. Some of the packaging and PID labels incorrectly call out 12d as the nail size when the actual size is closer to 10d. However, 10d and 3.0" lengths are nominal values as the actual length can vary by 1/8-3/16" of an inch depending on our suppliers source. SAS anchors specifying 3.0" sst spiral shank nails are included with our anchors and are certified to perform as specified in our manuals. Replacement nails can be purchased in 36pc retail packages No.2013 and 480pc boxes No. 2013-D.

**Warning! Do not substitute SAS specified fasteners for those manufactured or supplied by others.** Please direct any questions to our sales team.
