

# SideWinder® Self Retracting Lifeline

**SideWinder™** Self Retracting Lifelines (SRLs), are designed with a spring loaded retractable lifeline specified for personal fall arrest and work positioning. The internal braking system reduces free fall forces while arresting the fall. Our SideWinder® models have been in service for over 15 years and have proven to be very reliable. SAS provides factory service, repair and annual inspections with short lead times and we maintain an extensive inventory of spare parts.

## Features

- Heavy duty ABS housing
- Integrated carry handle/anchorage attachment w/No.5001-Z twist lock carabiner
- 3/16" galvanized cable
- Fall indicator snaphook
- Permanent engraved serial No. and part number
- Replacement English/ Spanish PID labels
- Retail box

## Compliance

ANSI Z359.14-12 Class B

## Integrated Handle

One piece handle supports the SRL anchorage attachment providing a fail-safe connection between casing sides.

## Braking System

In the event of a fall the internal energy absorbing braking system reduces free fall forces to less than 1,125lb.

## Performance Specifications

**Min. Strength:** 3,300lb (15kN)

**Cable:** 3/16" Galv. Steel (4.8mm)

**User wt.:** 310lb (140kg)

**Max. Arrest Distance:** 54"(1.4m)

**Avg. Max.Arrest Force:** 1,125lb (5kN)
