

Anchor Model Types

Standard design anchors mfg. with base plates and 3.0" od. or 4.5" od. risers, are available in sloped, field weld and ridge mounted models. Standard designs are also available by custom mfg. for project specific applications. Consult catalog pages for model type specifications.

Anchor Design Options

Symbols appear in the "Request Unit Pricing" sections to specify availability when ordering.

- ▲ Standard design stock part ready to ship
- Standard design requires custom mfg. in HDG, 304sst or 316sst.

Note: The absence of symbols designates SAS factory mfg. at time of ordering. Typically 1-3 days.
