

Z-Purlin HLL Rigging Examples

Z-Purlin HLL and VLL lifelines are rigged by orienting loop and pass-thru tops in the direction of the slope. CRZ-4 4-Way tops are specified for HLL longer than 240ft or use for VLL intersections.

HLL Rigging Example

HLL Rigging Example w/4-Way Intermediate Anchor

Use 4-Way for intersecting VLLs. Min. 8" riser height required for flashing base.
