

# RS-Anchors Tile Roof Retro-Fit / RS-10

## Tile Roof Retro-Fit Design

Designed specifically for installation with all types of concrete and clay tiles, the dual D-ring provides a tie-off point on both sides of the ridge. Easily formed to any tile contour, the D-ring will extend below the top course when used on tiles with a maximum length of 18". Also works well with other types of roofing materials.

**Compliance:** ANSI Z359.1 / OSHA 1926.502
