

Anchors Floor Joist Safety Bar

Providing fall protection during open framing has been especially difficult until now. The Floor Joist Safety Bar is designed for use on 4x2 engineered floor joist and roof trusses. This open framing fall protection anchor is designed for 2 users in fall arrest. Installs easily and locks in place with detent pins. Includes "bump bars" to help install or evacuate. All parts are easily inspected and can be replaced. Numerous models are available with wider fixed or movable/adjustable legs to fit different joist spacing. The unique and versatile Floor Joist Safety Bars are compliant with OSHA standards.
