

# Max-V™ Fall Protection Kits

## Max-V Fall Protection Kits No. 3200

If there's one product that almost every building and roofing material supply store sells, it is a "Complete" fall protection kit in a bucket. What makes our kits the best seller in the industry? Three primary ingredients: components, instructions and packaging. The Max-V is the result of years of marketing experience used to develop a high quality product at the absolute lowest cost with components our end users want. The Max-V is your go-to kit! Our top seller is assembled at our factory in Monroe, Wa USA. All components comply with ANSI Z359.1-07 and OSHA 1926.502 All class 1 connectors comply with ANSI/CSA 3,600lb gate strength.
