

Max-SG™ Fall Protection Kits

MAX-SG Kit

No. 3203

Same quality components as our Max-V with our exclusive SuperGrab non mechanical rope grab. Super Anchor Safety has marketed the prussic design sine 1992 with wide acceptance in the residential building sector. This rope grab has more testing and certification than any other type of rope grab or fall arrestor. Those who use the rope grab for the first time say they would never go back to a mechanical device. It's the only rope grab with a built in fall indicator. Manufactured in the USA by Super Anchor Safety in Monroe, WA

SuperGrab Features:

- Ergonomic hand hold and fall indicator feature
- Easily adjusts to growing lifeline diameter
- Holds position when in use
- The only rope grab that can be reverse rigged and used for Horizontal Lifeline systems
- 5,000lb min. tensile strength
- Does not corrode
- Will not damage metal roof panels
- Can be used on all Super Anchor Safety lifelines
- Lighter than a mechanical grab

SuperGrab Features:

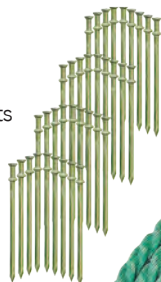

US Dept of Labor OSHA, CAL-OSHA
Wa State WISHA.
