

Fall Protection Lifelines

Lifelines Are One Of The Primary Components Of A Fall Protection System

Super Anchor Safety Offers 4 Primary Lifeline Material Types:

- Deluxe 12-strand poly-olefin
- Value 3-strand poly-dacron
- Maxima 3-strand co-polymer
- X-Line 12-strand with integral pneumatic air hose

Primary Types Of Lifelines Sold

- Lifeline with rope grab
- Fall Arrester w/factory attached absorber
- Lifeline without rope grab

Fabrication

All lifelines are assembled and packaged at our Monroe, WA factory. Our lifelines are mechanically swaged with a PVC cover and a 3,600lb gate strength snap hook. We also offer custom length lifelines with optional connectors.

Compliance and Quality Control

Lifelines are batch tested at our factory with certified equipment to confirm that the swaging and connector tensile strength meet ANSI, CSA and OSHA standards.

X-Line combines lifeline and air hose in a single component.
