

Fall Arrester™ Lifelines

Value FA Fall Arrester Lifelines

A unique design that combines the lifeline with a factory attached energy absorber reducing the component bulk that normally attaches to the full body harness dorsal D-ring. These Fall Arresters are manufactured at our Monroe, WA factory and are available in two models with either the Maxima or Value Lifelines. Custom lengths are available upon request. All components comply with ANSI Z359.1-07 and OSHA 1926.502.

Fall Arrester Specifications:

- No. 6180 Energy Absorber with factory attached snap hook
- 3,600lb gate strength connectors
- Aluminum swaged lifeline with PVC shrink tube cover
- Adhesive PVC end termination
- Serial numbered
- English/Spanish inspection fall Indicator and PID labels
- 310lb maximum user weight
