Lanyards with Snap Hook Connectors

Sewn on our automated machines, lanyards are constructed of 1.0" wide 9,800lbs nylon webbing that is vat dyed to retain its color. All web loop ends are reinforced with a wear pad that reduces chaffing caused by the connector and helps to extend the service life of the lanyard. We use state of the art programming and tested stitch patterns to make sure that we give you the absolute best lanyard money can buy.

- 1" wide nylon
- Webbing Tensile Strength: 9,800lb(44.5kN)
- 3,600lb(16kN) Gate Strength Snap hook
