

## Introduction

This manual is specified for use with full body harnesses (FBH's) mfg. by Super Anchor Safety®, does not replace SAS harness instruction manuals, and does not apply to FBH's mfg. by others. Persons assigned to inspect safety equipment or oversee safety, may include additional inspection points that apply to job specific uses or hazard exposure not specified in SAS harness instruction manuals that are supplied at the time of purchase.

OSHA and ANSI fall protection standards require that fall protection equipment is to be inspected at least once a year by a qualified or competent person as defined by OSHA. In the event a FBH is subjected to a free fall, damaged due to abuse or poor storage, or fails basic inspection requirements, it is required be removed from service and disposed of in a way that will prevent further use.

Questions regarding use of FBH's or this manual may be directed to SAS sales personnel.

## Inspection Manual Contents

Pg.	Description
1	Harness Overview
2	Inspection Points
3	Chest Strap/Connector Buckles
4	Waist Belt/D-Pad
5	Leg Straps/Webbing Inspection
6	Utility Belt/Webbing Keepers
7	PID Label Data Entry
8	Harness Inspection Form 1.0 Example
9	Harness Inspection Log Example
10	Harness Inspection Failure Example
11	PID Label Examples
	Connector Maintenance Advisory
Back Pages	Blank Harness Inspection Form 1.0
	Blank Harness Inspection Log

## How to use this Manual

Symbols are used to designate areas of inspection and specify required function tests of connectors.

☒ = Inspection Fail   ☒ = Inspection Pass

⊗ = Inspection point   ◀ = Stitching inspection.

**F** = Function test required.

For example: Inspection points ❶ shown adjacent to a harness component name, image or Fig. no., have a corresponding definition on page 2 of this manual. The same inspection numbers are listed on the harness inspection form 1.0 as a checklist to confirm if the harness component passes or fails inspection.

## Inspection Forms

Instructions and examples of how to fill out inspection forms using this manual, are shown on pages 9 and 10. Blank copies for making duplicates are included in the back of this manual. Live forms are available on the SAS website or by contacting a member of the sales team or our sales office.
